```php
public function moveForward($distance, $message)
{
    $this->turnOnEngine();
    $curPos = 0;

    while ($curPos < $distance) {
        $this->rollWheels();
        $curPos = $curPos + 1;
    }

    $this->turnOffEngine();

    $this->say($message);
}

public function run()
{
    $this->moveForward(14, "I have arrived");
}
```
